

SAGAR GAUD

3D Artist

E 7977059140 sagargaud88@gmail.com Mumbai

SUMMARY

I am an experienced 3D Artist with a strong background in animation and VFX, having worked for various clients including major brands like Disney and Amazon. My skills include 3D texturing and UV unwrapping, along with proficiency in industry-standard software such as Autodesk Maya and Substance Painter. I have a robust understanding of animation pipelines and a commitment to producing high-quality work.

EXPERIENCE

Freelance

Disney Animated Flipbooks & Various Clients

01/2017 - 01/2019 | Mumbai

- Freelance work creating digital flipbooks for various clients, including Disney
- Analyze the stories
- Adjust audio and sync the animation with speech

3D Artist

SuperDNA 3D Lab

02/2021 - 02/2022 | Mumbai

- Worked as a 3D Artist for various clients, focusing on eCommerce applications
- Analyze and break down the reference image of products
- Unwrapping of the UVs
- Make realistic textures based on the reference images

Executive Animation

Fat Hamster Studio

02/2022 - 08/2022 | Mumbai

- Worked as an Executive Animation for notable clients
- Analyze and understand the concept art
- Unwrapping of the assets
- Create textures based on the concept art as closely as possible

Quality Analyst

Creators3D / Hexa3D

08/2023 - 04/2024 | Remote

- Quality Analyst focusing on improving 3D model quality based on client feedback
- Analyze and compare the 3D model using reference images provided by the clients
- Write detailed and helpful feedback to the artist to help them with the quality guidelines

Quality Analyst

Assemble / Clickable Network

01/2025 - Present | Remote

- Quality Analyst focusing on maintaining quality content throughout the channel
- Analyze videos created by video editors to find glitches/artifacts in the audio or video
- Find mistakes in subtitles and provide accurate subtitle corrections to video editors that sync perfectly with the audio
- Write detailed feedback on Google Sheets and maintain a clean record for each video

AI & Automation Projects

Independent / Self-Directed

2025 - Present | Remote

- Built and maintain a local AI generation pipeline (ComfyUI, LTX video, ACE-Step music) on a custom Linux/NVIDIA workstation, including custom node debugging and Python environment management
- Developed automated job-scraping workflows in n8n that filter Reddit and Google Jobs postings via LLM integration (Gemini) and deliver curated leads to Discord
- Manage self-hosted infrastructure on an Oracle Cloud VM (Linux administration, Docker, systemd) supporting multiple automation workflows
